SERVICES

WASTE MANAGEMENT

At **Helenco S.A.**, our primary goal is to exploit all waste and our ideal objective is to achieve "ZERO WASTE". Waste management is equivalent to the use and production of alternate energy sources. The strategy, the policy, the objectives and the actions of our company are to adopt an alternative model for managing all waste in a contemporary and environmentally friendly way, thus offering the best environmental solution and meeting all the requirements of our clients.

MUNICIPAL WASTE

Having vast experience in the management of municipal waste, our company offers an integrated municipal waste management system which includes the implementation of programs to optimize the collection, the reduction of discarded waste and the recycling of the separated materials. Advanced methods and the most modern technological equipment are used, thus offering solutions adapted to the needs of our clients.

WASTE TRANSFER STATIONS

Helenco S.A. manages integrated waste transfer stations transporting, storing and processing solid waste for final processing.

ANIMAL BY-PRODUCTS

Animal by-products are divided into categories according to their risk factor. They are defined as products of animal origin or other products obtained from animals not intended for human consumption. For Helenco S.A., the management of these products are processes according to comprehensive community health regulations, which pertain to the collection, the transport, the processing, the marketing of these products or their rejection according to their category. Our company has all the necessary know-how and knowledge to completely manage animal by-products.

FOOD WASTE MANAGEMENT

Our company offers a comprehensive management of food waste for which it provides viable solutions. Taking into account that food waste is the largest source of waste, its management is based on their energy use, by converting them into green energy. This way the following is achieved:

- The conversion of our trash into energy (electricity, heat, biofuels, etc.)
- The drastic reduction of the volume of waste going into landfills.
- The improvement of environmental protection.

EXPIRED FOOD MANAGEMENT

Our company undertakes the collection and management of expired food, especially taking into account that the equipment which the company possesses caters to all types of food production nationwide. Expired food is processed, recycled and converted into energy sources.

MEDICAL WASTE

Medical waste is divided into categories according to their type and their risk factor. Having taken into account the complexity and the risk of this type of waste, our company specializes in the integrated management in compliance with strict regulatory protocols, thus making us more than able to manage medical waste in all Health units in the country.

FACILITIES MANAGEMENT

Helenco S.A., by offering innovative solutions, is more than capable to systematically and comprehensively maintain your facilities and industrial sites by providing comprehensive management services of all types of waste; green maintenance, specialized cleaning services by applying green and efficient practices, all resulting in cost-effective, quality, time saving and optimization of your plant's efficiency.

COMPREHENSIVE WASTE MANAGEMENT

Each one of our clients constitutes a special project for us and the client's needs are taken into account in order to propose custom-made solutions specific to its needs. A comprehensive waste management is provided, which is mainly based on the use of waste in the production of alternative energy sources thus, offering the best environmental solution.

The Materials Recycling Facilities (M.R.F.) are facilities, where a combination of mechanical methods are used for manual sorting, separating them into groups of materials which come from a common recyclable source. Then, the materials undergo a qualitative upgrading and are packaged according to each material, thus they are able to achieve the quality required for their reuse.

The Plant of Mechanical Recycling and Composting (P.M.R.C.) waste, is a modern factory processing and recycling unit of mixed urban waste, which when in operation, contributes to achieving national goals for recycling. Its construction was carried out with financing from the Community Support Framework.

GREENERY SERVICES

Our company provides all services related to the integrated management of greenery and in landscaping by implementing green practices based on energy efficiency standards. We undertake urban and rural green areas regardless of their acreage.

CLEANING SERVICES

Our company offers specialized and high-level cleaning .The company's staff is highly experienced and capable with years of experience and undergo continuous training and, coupled with our innovative expertise, we guarantee the highest quality of the services we offer to industrial facilities, sewage networks and to the environment with our specialized beach cleaning. Our goal is to restore the environment to its original form and minimize its pollution thus contributing to the ecological restoration.

WASTEWATER TREATMENT

Our goal is the integrated management of liquid residues and biological sludge by applying and identifying the requirements of national and European environmental legislation. Considering that liquid waste is connected with potential risks to public health and the environment, methods have been developed for their immediate, effective and safe management.

MACHINERY RECYCLING

Helenco S.A. undertakes the recycling of machines in industrial areas as well as industrial products. It specializes in the collection, sorting and transporting them to certified organizations and using them as raw material for the production of alternative energy sources.

INTEGRATED MANAGEMENT - MARINE CONSERVATION

Our company offers complete marine management and conservation by applying high quality management systems and environmental protection by cleaning the sea and land areas, applying antipollution practices, managing all waste with the collection, sorting, transporting and processing of said waste.

CLEANING SERVICES

Having a clean environment as a priority, Helenco S.A. offers complete cleaning solutions in order to improve the ecosystem by offering specialized services for cleaning beaches, water and sewage networks as well as industrial units and facilities of sanitary interest.

BEACH CLEANING

Our company has all the necessary equipment and expertise for specialized beach cleaning. We undertake the collection of waste for recycling materials as well as the removal of unusable waste. The coast and its waters are thus cleaned from any source of pollution, and the natural environment and the future of our children is well protected.

WATER DRAIN AND SEWAGE NETWORKS.

Cleaning water and sewage networks and requires a specific skillset and technologies. Helenco S.A. offers both and guarantees a clean, safe and functional network.

CLEANING OF INDUSTRIAL, HOTEL AND HEALTH UNITS

Our company offers innovative solutions for the complete sanitation of industrial facilities and health units, providing specialized solutions to our clients by applying green and efficient practices resulting in cost-effective, quality work and ensuring a safe and healthy environment.

ENVIRONMENTAL RESPONSIBILITY

Our company, with an increased sense of social responsibility, having environmental protection and the improvement of the quality of life as its primary objectives, continuously invests in new technologies and practices, in order to help the protection of the environment for a cleaner future.

CORPORATE SOCIAL RESPONSIBILITY

Our company, with an increased sense of social responsibility, and having environmental protection and the improvement of the quality of life as its main objectives, focuses on supporting vulnerable social groups, on the continuous development of both expertise and upgrading its equipment while constantly informing citizens and clients about their waste management.

Helenco S.A. aims at collaborating with non-profit organizations and also with businesses in the private and public sector.

Our vision is the effective and efficient management of waste, maintaining and improving the environment with the utmost objective of '' **ZERO WASTE** '. With this as a philosophy, we encourage the reusability of all products in the same way that nature reuses its natural resources.

The company's aim is to promote culture, sports and healthy environmental protection and for these purposes we actively participate in charitable activities that take place throughout the country.

Our vision is the effective and efficient management of waste, maintaining and improving the environment with the utmost objective of "**ZERO WEST**".

ZEROWEST

- Waste Bins

A wide-angle photograph of a sunset over the ocean. The sun is a bright, glowing orb partially obscured by a thin layer of clouds, positioned in the upper right quadrant. Its light reflects as a shimmering path on the water's surface. The sky transitions from a deep blue at the top to a lighter, hazy blue near the horizon. The water is a deep, textured blue. In the distance, a small boat is visible on the horizon line, leaving a dark wake. The overall mood is serene and contemplative.
